

The Lillingstone Trust offers scholarships to encourage pupils from lower income backgrounds who are deterred by financial constraints from exploiting their potential by continuing into higher education.

Scholarships will be awarded mainly, but not exclusively, to pupils applying to research based universities to study science, technology, mathematics or engineering.

Scholarships will have maximum value of **£4,000**, with payments spread over the first three years of the degree course. The first year's award will be £1,500 to assist with the purchase of required equipment and books. To receive subsequent yearly grants applicants will need to provide evidence to the Trustees of their successful academic progress and to confirm that they have a continuing need for support

The Trustees will carefully consider all applications, the Scholarships are granted on a discretionary basis and the Trustees will not enter into any correspondence or discussion about their decisions. In considering applications, the Trustees will ask the School to provide an academic/personal assessment of each applicant.

All information you provide will be received in confidence by the Trustees who may discuss your application with the School. Guidance on completion of your application can be provided by your Head of 6th Form.

The Trust has set aside a small fund to assist those pupils requiring assistance with the costs of travel to attend interviews at universities, please ask your Head of 6th Form if you think you require this support.

Please complete your application clearly and return it to your Head of 6th Form.

If you have received the form direct from The Lillingstone Trust, please return to:-
